

SR2MyTIMEkeeper™

1.0

What is SR2 MyTIMEkeeper™? It is simply a software that keeps track of your employees' time attendance. One of the many advantages of SR2 MyTIMEkeeper™, it uses MyKAD as a part of employee's ID. This reduces the common unhealthy working culture for clocking someone else attendance. How many of us dare to give out our own MyKAD to someone simply to clock ourselves in? Hardly.

Having to use MyKAD as a part of its unique ability to keep track your employees working hours, it does not require any further investments of needing any special or new employee's iD. If your company has already invented an employee iD, you may continue using it. Unlike other software, SR2 MyTIMEkeeper™ is affordable and reliable. You only need a very little investment to make it a part of your system. As long as you have a Windows Operating System installed and network or none-network based PC, you are set to go. Almost no maintenance required except putting in your employee information onto SR2MyTIMEkeeper™.

Another sweet built-in feature is the ability to check the data from remote¹. This is a good add-on feature we provide for the bosses. All the boss needs is an internet connection to get connected to the SR2MyTIMEkeeper™ installed in the office.

The attendance capturing process takes in less than 4 seconds². Eliminating any long queuing during the process.

¹ only apply for the SR2MyTIMEkeeper™ PRO version or Network License version.

² speed depends on PC specifications, more RAM, fast processor, newest operating system leads to faster capturing process.

Min System Requirement

Processor	Pentium III or better
OS	Windows 98, NT, 2000, XP
Hard Disk Space	10Mb
Memory	256Mb (512Mb/1Gb Recommended)
CD Rom	Yes
